Business offer

We can help with development, production and game design from prototype phase to finished project. There is a part of our offer below:

Software/game development

We are able to create complete game or application according to client's requirements in work for hire model. We offer professional development divided into milestones including client's feedback at different stages of production.

Continuation or polishing up of unfinished projects

We can take over control of the unfinished project which for some reason hasn't been finished. We are able to redesign, systematize and fastly start a new development starting with writing a report about current project condition.

Developing or maintenance of finished projects

We also offer developing an existing games, for instance: creating DLCs, Patches, extension packs, skins etc. We are able to maintenance online games during its lifetime (creating events in the game, adding skills or items etc.).

Game/level design consulting

We offer help/support or creating game or level design and providing feedback to client's latest builds once or via permanent cooperation during a game development.

Game pitch creating or consulting

We can also create attractive game pitch considering client's requirements, platforms, target group, time and money budget.

Mechanics design

We offer mechanics design in the approachable documentation and dividing it into tasks in project management software (e.g. Jira, HacknPlan etc.). Except mechanics we can also design levels, gameplay, characters etc.

Writing dialogs and texts for the game

We are able to write professional texts to the game: dialogs, writings, letters, ingame texts, diary entry etc.

Narrative and story design

We are able to design characters and story according to game mechanics and combine it with gameplay. We can also can consult and feedback curent narrative and story design assumption.

To ask about any other types of cooperation please write us an email in the contact section.
